

## Agriculex CB-1 + CB-2 Column Blower

Bag trash catcher

Acrylic top trash catcher

Easy clean out trash catcher

CB-2 bag trash catcher

### Features:

- 1) Cleans out quickly and completely between samples. No carry over.
- 2) Clear acrylic column allows the sample to be seen at all times.
- 3) The airflow can be regulated precisely to give optimum cleaning of each sample. The machine has a stop which can be set to open the valve at the approximate airflow required for the seed samples. If some samples need more or less airflow, the stop can be over-ridden by increased force on lever. **This makes it extremely quick to adapt on samples**, no electronic fan speed, timers etc. necessary !
- 4) Dust bag with zippered bottom for easy clean-out keeps the work area clean.  
(The Acrylic top version has a gauze on top) If necessary the CB-1 can be easily connected to a central dust aspiration system.
- 5) Works very well to clean single plant samples / small samples for quality analysis etc.

### Description of Options:

The **Acrylic top** as well as the **Easy clean out** allow you to retrieve the material which is blown out. This is useful if you want to fractionate samples into light and heavy seeds, or if you are afraid of blowing out too much of your seed during cleaning. (see pictures front page)

Data: (CB-1 basic model bag trash catcher, easy clean out and acrylic top approx 50-100 mm higher)

	CB-1	CB-2	
Height:	860 mm	1195 mm	
Length:	350 mm	690 mm	
Width:	300 mm	435 mm	
Column Ø:	63 mm	165 mm	
Cup height:	50 mm	90 mm	
Max sample:	10-15 g,	100-400 g	depends on weight / volume
